### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Steiner et al. (US 5,499,984).

Steiner et al. disclose a flexible tap apparatus member (20, 30) including a flexible upper shaft portion including ridges 21 and a flexible lower shaft portion that is coupled to an adaptor or "handle" 33 (Figs. 1 and 10, col. 3, lines 31-67, col. 4, lines 1-50 and col. 5, lines 41-47).

Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Boucher et al. (US 6,716,216).

Boucher et al. disclose a flexible tap apparatus member including an upper shaft portion having ridges 88, a lower shaft portion having a substantially smooth surface, an axial passage extending along the flexible shaft and a handle 80 configured to receive the lower shaft portion (Figs. 16D and 18A-C, col. 13, lines 62-67 and col. 14, lines 1-23).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bonutti (US 5,269,785) in view of Boucher et al. (US 6,716,216).

Bonutti discloses cutting tips or tap apparatus members including a upper shaft portion including ridges and a substantially or "nearly smooth" lower shaft portion that is coupled to a flexible drill shaft or "handle" wherein the tap members can be made of any suitable material depending on the areas of tissue to be cut (Figs. 3 and 14A-E, col. 5, lines 50-68, col. 7, lines 31-68 and col. 8, lines 1-25).

Boucher et al. teach making a drill bit or "cutting tip" or "tap apparatus member" of a flexible plastic material when associated with a flexible shaft to guide the cutting edge along a desired drill axis (col. 13, lines 62-67 and col. 14, lines 1-7).

Accordingly it would have been obvious to one of ordinary skill in the art at the time the invention was made to have made the Bonutti tap apparatus members of flexible plastic material, as taught by Boucher et al., to guide the cutting edge along a desired drill axis.

The method steps of claims 12 and 13 are performed when different tissue areas are cut with the device of the combination of Bonutti and Boucher et al.

***Response to Arguments***

Applicant's arguments with respect to claims 1, 7 and 12 have been considered but are moot in view of the new ground(s) of rejection.

**Conclusion**

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
